1630-1830	SESSION VIII - AUSTRALIAN CIVIL-MILITARY CENTRE FOCUS SESSION

JUDI SUTTON ARTIST STATEMENT

My name is Judi Sutton and I am a contemporary Indigenous artist from the Kalkadom people, this painting is my interpretation of Joint Health Command and their Journey.

In my painting the large purple community symbol in the centre of the artwork represents Joint Health Command with the coloured hands and people in the middle of the community symbol representing their goal of 'Healing our Patients'.

The large rings around Joint Health Command's community symbol in yellow, green, blue and purple represent Joint Health Command's mission to 'Co-ordinate, deliver and assure the ADF health system in order to enable the Joint Force'. These rings connect the five large community symbols which represents each of the services, to each other and to Joint Health Command. These community symbols with white symbols inside represent the Navy, Army, Air Force, AFS and contractors. The groups of people around the outside of the large yellow ring represent Joint Health Command's Vision 'Trusted to Care'.

The footprints which lead into the centre community symbol represent the Health workforce's journey to become a part of Joint Health Command, and the medicine leaves around the centre represent Joint Health Command's ability to enable ADF capability.

The kangaroo and emu footprints represent how Joint Health Command are always moving forward and never backward, just like the kangaroo and emu. Lastly the leaves and blossoms, wind, waterholes, cracked earth and mountains around the outside of the artwork represent the many diverse environments and regions where Joint Health Command provide their services, from the coastlines, to the desert, from the rainforest to the skies.
